

Contents

1 Basic concepts	9
1.1 The human leukocyte antigen (HLA) system	9
1.1.1 Introduction	9
1.1.2 Genetics, polymorphism, and nomenclature of the HLA system	10
1.1.3 HLA molecules and genes	25
1.1.4 Function and expression of HLA molecules	30
1.2 Tissue typing and histocompatibility testing	34
1.2.1 Indications for tissue typing	34
1.2.2 Methodology of tissue typing	35
1.2.3 Anti-HLA antibodies and serological cross-matching ..	42
1.2.4 Cellular cross-matching	48
1.3 HLA and transplantation	49
1.3.1 Immunological aspects of alloreactivity	49
1.3.2 HLA compatibility and organ transplantation	52
1.3.3 HLA compatibility and allogeneic stem cell transplantaton	57
1.4 HLA and transfusion	63
1.4.1 Platelet transfusion	63
1.4.2 Granulocyte transfusion	63
1.5 HLA and cancer	64
1.5.1 Immune surveillance	64
1.5.2 HLA class I expression on tumors	64
1.6 HLA and disease	64
1.6.1 Association and linkage	64
2 Methods	74
2.1 Sample collection and cell isolation	74
2.1.1 Lymphocytes	74
2.1.2 Cell isolation	75
2.1.3 Cryoconservation of lymphocytes	77
2.2 Serological and immunological methods	77
2.2.1 Lymphocytotoxicity	77
2.2.2 Cellular flow cytometry	85
2.2.3 Direct antigen-specific detection of anti-HLA antibodies	87

2.3	Molecular genetics methods	90
2.3.1	DNA extraction	90
2.3.2	Whole-genome amplification	92
2.3.3	Polymerase chain reaction	92
2.3.4	Probe hybridization methods (PCR-SSO/-SSOP) ...	94
2.3.5	Primer-based analytic methods (PCR-SSP)	97
2.3.6	Direct sequencing (PCR-SBT)	99
2.3.7	Other genotyping methods	102
3	Quality management	103
3.1	Principles of quality management	103
3.1.1	Introduction	103
3.1.2	Accreditation and certification	106
3.2	Implementation of quality management	107
3.2.1	Quality control	107
3.2.2	Quality assurance	108
3.2.3	Personnel	109
3.2.4	Introduction of new methods	110
3.2.5	ASHI/EFI accreditation	111
4	Appendix	112
4.1	Internet resources	112
	Societies for immunogenetics and histocompatibility testing	112
	Standards for histocompatibility testing and accreditation	112
	Data bank	112
	Unrelated stem-cell donors	113
	Collaborative Transplant Study	113
	Immugenetics journals	113
	Synopsis of in-text cited internet resources	114
4.2	Technical literature	114
	Detailed laboratory protocols and data collections	114
	WHO nomenclature	115
	Serological equivalents	115
	Population genetics and biostatistics	115
5	Technical terms index	116
